

Natural Materials Statement

We strive for getting always natural raw materials devoid of pesticides and insecticides and then we use our 3 decades of knowledge to purify these materials through gentle processing.

When we deal with these natural materials globally we have experienced variations due to geographical and seasonal factors which are beyond our control.

We do not sell our materials based on specific markers and we do not have any plans to disturb the mechanism of procuring our raw materials. Thus we trust that our Suppliers with whom we have been working for ages act in similar ethical way as we do.
