

ICSC - COSMOSIL DS – DRY SKIN REPAIR OIL I.S.

INCI Name: Brassica campestris seed oil
CAS No.: 8002-13-9/90989-79-0

INCI Name: Oryza sativa Bran oil
CAS No.: 68553-81-1/84696-37-7

People all over the world are currently being advised to use hand sanitizers and wash hands regularly. This has the side effect of causing skin conditions as irritation, inflammation, cracks on the skin or even eczema.

At ICSC, we have developed **Cosmosil DS - Dry Skin Repair Oil** that will help restore and moisturize the skin and fight the dryness experienced due to excessive handwashing.

The oil has a unique composition and usage of this product regularly should prevent any damage to the skin.

Cosmosil DS Dry Skin Repair Oil is packed with essential fatty acids and highly boosting natural antioxidants. It is exceptionally stable to oxidation and furthermore Cosmosil DS is completely natural and it contains no toxic or irritating materials, which means that it can be applied even on sensitive skin and on babies.

Applications: soothing and moisturizing skincare and hand care.

Cosmosil DS – Dry Skin Repair Oil is a brilliant golden yellow oil internally stabilized with herbal extracts. It is an outcome of ICSC in-house research and development.

It is a 100% vegetable oil, refined and designed as base oil for cosmetic application. It has an excellent balance of useful fatty acids and high content of antioxidants which contributes to its unique oxidative stability.

It is very attractive as an emollient for many skin care applications, as it can quickly moisturize and repair dry skin.
